Professional Summary

Motivated professional with **1.10 years of enterprise experience** successfully transitioning into DevOps and Cloud Engineering. Proven track record of bridging the gap between software development and IT operations by implementing robust DevOps practices. Strong hands-on technical foundation in **Linux, AWS, Docker, Azure DevOps, and Terraform**. Adept at enhancing automation in CI/CD deployment pipelines, monitoring high-performance applications, and fostering cross-team collaboration to create stable, scalable operating environments. Seeking to leverage infrastructure automation skills to drive results and growth as a DevOps Engineer.

Technical Skills

OS & Scripting: Linux (Ubuntu, CentOS) [Primary], Bash Scripting, Python (Automation)
Cloud & DevOps: AWS (S3, EC2, VPC, CloudFront), Azure (Instances, Blob Storage, Resource Groups), Azure DevOps, Docker, Kubernetes, GitHub Actions, Jenkins, GitLab, GitOps, Terraform, Ansible
Observability & Monitoring: Prometheus, Grafana

Professional Experience

DevOps Intern June 2026 – Sep 2026
Global Tech Professionals *Remote*

- **Azure DevOps Pipelines:** Maintained and optimized CI/CD workflows using Azure DevOps, structuring and managing core pipeline configurations including `dev.yaml` and `main.yaml` for reliable software delivery.
- **Azure Cloud Migration:** Orchestrated a complex, cross-cloud migration of a live relational database (73 tables) from DigitalOcean to Azure with zero data loss, utilizing custom Python automation for integrity auditing.
- **CI/CD Pipelines & Automation:** Contributed to the development of continuous integration and deployment pipelines using **GitHub Actions** and **Terraform**, significantly reducing the time from commit to production environments.
- **DevOps Integration & Collaboration:** Facilitated the integration of software development and IT operations by bridging gaps across teams, ensuring seamless cloud deployments and optimized development workflows.
- **Infrastructure Optimization:** Architected the migration of 100+ web applications to AWS, helping to create stable and scalable operating environments while reducing hosting costs and ensuring secure global delivery.
- **Application Monitoring & Support:** Assisted in monitoring high-performance application environments using **Prometheus** and **Grafana**, proactively responding to operational issues to ensure maximum uptime.

Process Delivery Specialist Oct 2024 – May 2026
IBM *Chennai, India*

- **Virtual Infrastructure Management:** Utilized **VDI (Virtual Desktop Infrastructure)** to access and manage Windows-based client-server environments remotely.
- **Operational Issue Resolution:** Proactively monitored and responded to environment issues from a user perspective, performing VM restarts, session resets, and escalating complex infrastructure blockers to US-based operations teams.
- **System Integrity & Validation:** Engineered and executed automated validation scripts to perform "Self-Audits" on large datasets, creating a feedback loop for proactive error detection to ensure 100% operational accuracy.
- **Performance Excellence:** Awarded **"Star Performer"** for two consecutive months and received a **Client Award** for maintaining high-reliability standards in project delivery.

Infra Management Engineer (Freelance Community) June 2023 – Oct 2024
Rampotech *Remote*

- **Infrastructure Deployment:** Contributed to the deployment of scalable, high-performance cloud infrastructure on **AWS EC2**.
- **Containerization Practices:** Collaborated with cross-functional teams to implement **Docker** for application containerization, ensuring consistent environments and optimizing the development process.
- **Automation Implementation:** Assisted in the design and execution of automated delivery workflows, encouraging the use of agile methodologies to support rapid deployment schedules.

Technical Projects

Automated Application Deployment on AWS | *GitHub Actions, Docker, Trivy, Python* 2026

- Engineered an end-to-end CI/CD pipeline using **GitHub Actions** to automate the build and deployment of an application directly to **AWS EC2**.
- Containerized the application using **Docker**, configured automated image pushes, and integrated **Trivy** to scan images for security vulnerabilities prior to deployment.
- Achieved a fully automated zero-touch deployment workflow where every code push triggers a seamless deployment to production, reducing manual overhead.

SilentHold Smart Dialer | *Android Studio, Java* 2026

- Engineered a native Android app featuring a custom automation algorithm to auto-silence recipient hold music.
- Designed a premium Dark Mode UI with T9 smart search and haptic feedback.

Certifications

Azure Fundamentals (AZ-900) | *Udemy* 2026
- Mastered the core concepts of Microsoft Azure, building a solid cloud computing foundation for managing technical environments.
- Completed comprehensive self-paced training aligned with AZ-900 concepts to support infrastructure scaling.

Master DevOps with AWS, GCP, & Kubernetes | *Udemy* 2026
- Comprehensive self-paced bootcamp covering Linux, AWS, Jenkins, Docker, Kubernetes, Terraform, and Ansible.
- Implemented automated workflows for robust infrastructure scripting and continuous delivery.
- Mastered Monitoring & Observability using **Prometheus** and **Grafana**.

AWS Cloud Practitioner Essentials | *AWS Training and Certification* 2026
- Gained proficiency in core AWS services (Compute, Storage, Networking) and the Shared Responsibility Model.

Education

Bachelor of Computer Applications (BCA) 2022 – 2025
University of Madras (Distance Education) *Chennai, India*

Bachelor of Science May 2024
Dwarka Doss Goverdhan Doss Vaishnav College *Chennai, India*
